

## SOLUTION

# Veterinarians

The number of veterinarians worldwide has never been larger, resulting in the increased demand for veterinary imaging solutions that ensure maximum productivity and the most efficient workflow.

## Overview

Over the last decade, the number of global vet practitioners has increased. Additionally, there is an increased interest in improving the productivity and health of livestock.

These factors have in turn seen a rise in the demand for better healthcare for companion animals, and the need for accurate and effective tools for the diagnosis of diseases.

The Candelis family of products is perfectly suited to meet the demands of veterinary imaging, with hardware and software solutions covering the entire workflow from image management, storage and distribution to viewing and diagnosis.

## Image Viewing

Candelis offers the ImageView™ suite of visualization applications, integrated with our image management and workflow solutions. Residing on the ImageGrid™ PACS server, the viewers can be accessed from by veterinarians using local and remote workstations.

## FEATURES INCLUDE:

- Customizable per-modality annotations
- Distance measurements
- Angle measurements
- Pan, rotate, and mirror
- Magnification glass
- Cine tool with adjustable speed
- Multiple concurrent users
- Dictation support with voice attachments

## Veterinarian Imaging PACS Server

ImageGrid™ is a fully integrated image management and workflow optimized PACS solution, consisting of a suite of sophisticated image archiving, image management, visualization tools, and workflow optimization capabilities closely integrated with state-of-the-art hardware.

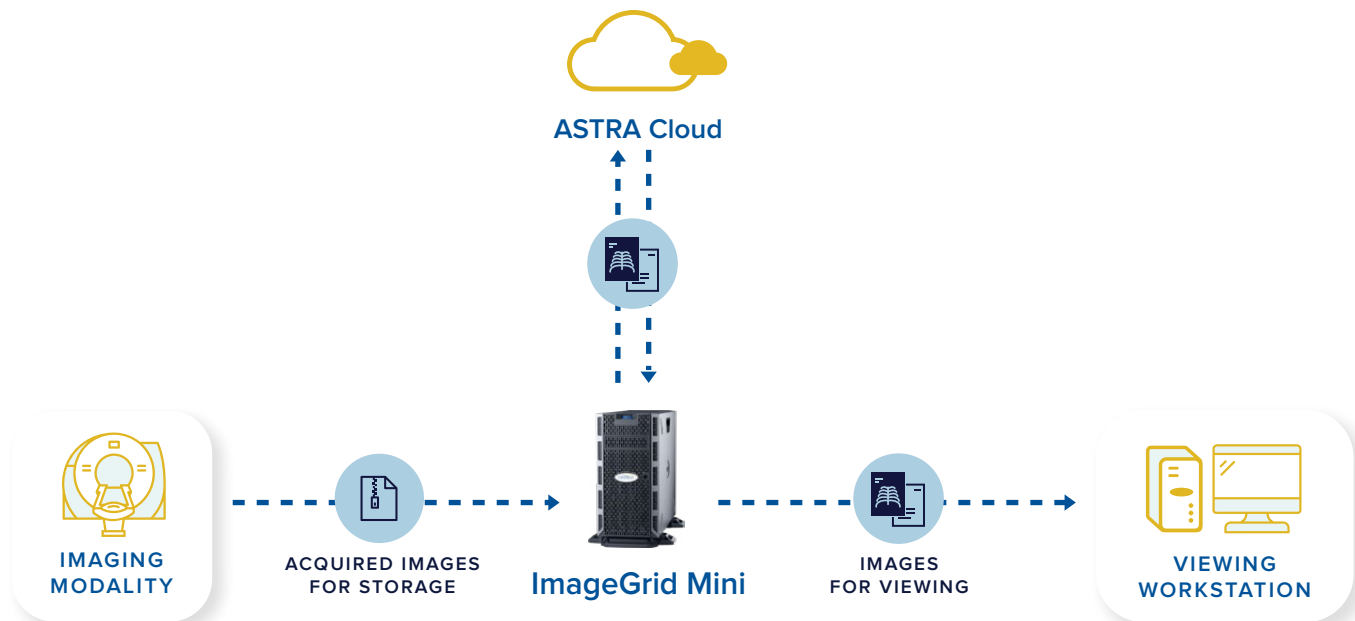

### FEATURES INCLUDE:

- Multi-modality support
- Automated rule-based pre/post-fetching of relevant priors
- Integrated reporting with templates
- Click to burn CDs or export studies to removable storage
- EMR integration
- Scalable storage
- Self-monitoring and automated reporting
- Web-based system administration, dashboard and operator interface
- Archive on-site and in the cloud
- Long-term archive and disaster recovery

## Fully Integrated Workflow

ImageGrid provides everything you need to manage, store, view and archive veterinary images.

## Cloud Storage & PACS

ASTRA™ by Candelis is a next-generation cloud service designed to complement ImageGrid and Candelis' software solutions with a range of robust capabilities.

ASTRA offers speed, security and scalability, providing peace-of-mind to veterinarians that their images are safe, secure, and always available.

### FEATURES INCLUDE:

- Seamless, secure sharing of studies
- Automatic offsite archive
- Robust security using proprietary encryption
- Multiple image and report viewing options
- Hassle-free disaster recovery
